

The innovative hoof trimming tipping crush for professionals!

- Simple, intuitive operation: fast and easy handling!
- No touching of the animal necessary: catching, belt and foot fastening works hydraulically!
- Only 30 seconds from the first step into the crush to having all 4 hoofs ready in working position!

The new RS-Q is the systematic further development of the tipping crush for real professionals. This crush was jointly developed with experienced professional hoof trimmers and sets itself apart by its pace and performance combined with the highest level of animal comfort and simplicity of operation.

Universally applicable in the versions:

- **Stationary:** for professionally operating large farms
- **Trailer:** particularly agile and mobile – the RS-Q trailer
- **Truck:** the truck structure as a complete all-in-one system

Equipment features:

- **Hydraulic catching and fastening system** enables fastest possible catching
- **Hydraulic belt system** adapts automatically to the animal size
- **Hydraulic leg holder system**, especially gentle and firm grip
- **Simple, intuitive operation** for highest comfort and a compact workspace
- Numerous additional features and options available

Technical Data:

Recommended animal weight:	approx. 450 to 1100 kg
Hitch, transport:	stationary, trailer, truck
Electric supply	400 V, 50 Hz
Transmission:	4 kW hydraulic unit
